

Sprint 4: Rating, Reviews, and Recommendations Functionality

Objective:

Improve user engagement through property recommendations and a rating and review system.

Sprint Details:

Implement features for property recommendations, allowing users to rate and review properties, and enabling property owners to respond to reviews.

Entity Objects:

These represent the core data or concepts within the system:

- User
- Property Owner
- Database

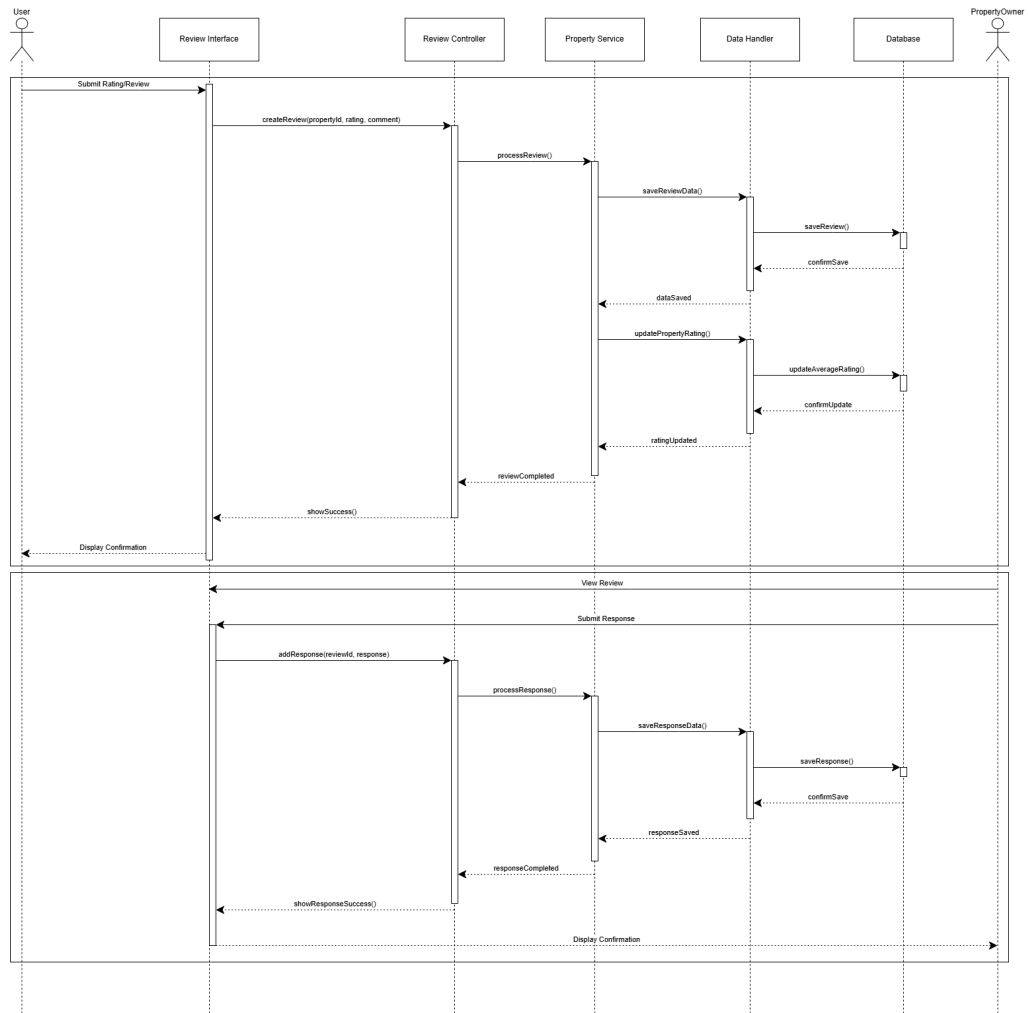

Boundary Objects:

- Review Interface
- Data Handler

Control Objects:

- Review Controller
- Property Service
