

# Booked slots Black Box Testing

## Booked slots:

- The booked slots are shown and the option to cancel is available. If the user cancels the slot, a cancelled message is displayed.
- If the slot is left to be visited, a pending message is shown. • If the slot is visited it will be reflected.

Test Case ID	Scenario	Input Data/Action	Expected Output
Test Case ID	User views booked slots	Navigate to the "Booked Slots" section	All booked slots are displayed with the current status ("Pending," "Visited," or "Canceled") and a "Cancel" option for pending slots.
Test Case ID	User cancels a slot	Click "Cancel" for a pending slot	The status of the slot changes to "Canceled," and a "Canceled" message is displayed.

Test Case ID	User leaves a slot as pending	Do not perform any action on the slot	The status remains as "Pending," and a "Pending" message is displayed.
Test Case ID	User marks a slot as visited	Slot status is updated automatically after the visit	The status changes to "Visited," and a "Visited" message is displayed.
Test Case ID	User views canceled slots	Navigate to the "Booked Slots" section	Slots marked as "Canceled" are displayed with the appropriate "Canceled" message.
Test Case ID	User views pending slots	Navigate to the "Booked Slots" section	Slots left as pending are displayed with the appropriate "Pending" message.

<b>Test Case ID</b>	User views visited slots	Navigate to the "Booked Slots" section	Slots marked as "Visited" are displayed with the appropriate "Visited" message.
<b>Test Case ID</b>	User cancels multiple slots	Cancel multiple pending slots	Each canceled slot changes status to "Canceled," and the "Canceled" message is displayed for each.
<b>Test Case ID</b>	User cancels a non-pending slot	Attempt to cancel a slot already marked as visited	System prevents the action and displays an error message, e.g., "Cannot cancel. Slot already marked as visited."
<b>Test Case ID</b>	User marks a canceled slot as visited	Attempt to mark a canceled slot as visited	System prevents the action and displays an error message, e.g., "Cannot mark as visited. Slot is canceled."
<b>Test Case ID</b>	User cancels all pending slots	Cancel all slots marked as "Pending"	All slots change status to "Canceled," and "Canceled" messages are displayed for each.
<b>Test Case ID</b>	Slot is left pending beyond the visit date	Do not mark or cancel the slot after the visit date	System automatically updates the status to "Pending Expired" or similar, with a message indicating the slot was not marked or canceled in time.
<b>Test Case ID</b>	User checks system behavior after status updates	Perform various actions (cancel, mark visited, etc.)	The system maintains consistent statuses for all slots, and updates are reflected in real-time across the interface.
